ANTI-LOCK BRAKES

Stop right there. For added steering control while braking hard in adverse driving conditions, choose the available Anti-lock Braking System² complete with Traction Control.³

SEATBELT PRETENSIONERS

Front seatbelt pretensioners tighten the belts during a frontal impact. This reduces forward movement while positioning the occupants for optimal effectiveness of the airbags.

■ **PROTECT YOUR VALUABLES.** Your safety, as well as your passengers', is of the utmost importance to us. That's why dual front and front seat-mounted side-impact airbags¹ are standard, as well as front seatbelts with pretensioners and force limiters, 3-point seatbelts for all seating positions, rear LATCH child-seat attachment system, childproof rear door locks and more. All housed safely within its steel-reinforced unibody structure.

¹ The Supplemental Restraint (airbag) System (SRS) is designed to work with the 3-point seatbelt system. The SRS deploys in certain frontal and/or side-impact conditions where significant injury is likely. The SRS is not a substitute for seatbelts, which should be worn at all times. Children under the age of 13 should be restrained securely in the rear seat. NEVER place a rear-facing child seat in the front seat of a vehicle that has a passenger-side airbag.

² Available as part of a specific option package. See dealer regarding availability.

³ The Traction Control System (TCS) is meant to enhance conscientious driving habits, and is not a substitute for proper driving procedures. Available as part of a specific option package. See dealer regarding availability.

- A BODY-COLOR REAR LIP SPOILER GIVES THE GT AERODYNAMICS AND STYLE
