

CIMARRON

Handwritten signature

Developed by Cadillac Design Studios, the "Cimarron CART PPG Trackside" vehicle is a striking aerodynamically designed concept car that's built on a 1985 Cadillac Cimarron platform with a 5" extended wheelbase. This dramatic Dual Cowl Phaeton has been engineered for VIP courtesy use during the CART/PPG Indy Car World Series of Racing Events, and is powered by a specially built front transverse-mounted 2.8 liter multi-port fuel injected V-6 engine with heavy-duty cooling. Potential top speed is 120 mph at 5600 rpm engine speed.

The body design features such innovations as one-piece molded front and rear panels... door latch handles located on the interior only... specially designed windshields for both the front and rear compartments...and wipers that are concealed beneath a rising panel.

Inside, lightweight, low-back bucket seats in the front and rear compartments are covered in soft leather—used exclusively throughout the interior. Vest type, 4-point seatbelts with 2" webbing provide an extra margin of safety for all CART PPG Cimarron occupants.

This beautifully engineered machine includes some of the most exotic hi-tech electronics ever built into an automobile. Panasonic commercial television sets are provided front and rear in unique, full-length consoles.

The CART PPG Cimarron features a Cellular telephone controlled from a fixed hub steering wheel. It may be used "hands free" or with a conventional handset. A two-way radio, with twin headsets, is also available in the front compartment. Passengers in the rear compartment are provided with an information panel that displays the status of various engine functions and outside temperature.

Cimarron CART PPG Trackside Vehicle

Vehicle Type

Front engine, front-wheel drive, 4-passenger, 4-door open body.

Engine

Type multi-port fuel-injected V-6, 2.8 liter, front transverse-mounted.

Dimensions

Wheelbase 106.2 in.
 Length 188 in.
 Width 68 in.
 Height 35.5 at cowl, 47 in. over front windshield.

Suspension

Heavy duty Delco Bilstein struts and dampers front and rear.

Steering

Type power rack and pinion with tilt column.

Brakes

Type power front disc-rear drum, self-adjusting with Delco electro-hydraulic servo booster and heavy duty linings with added cooling.

Wheels and Tires

Wheel Type two piece Alcoa aluminum alloy
 Tires Goodyear Eagles P225/50VR16

AVAILABLE ACCESSORIES
