A FUN-LOVING PAIR...

Deluxe Sportvan 90—90" wheelbase

Sportvan 90

Sportvan is Chevy's fun-loving version of the rugged, low-cost Chevy-Van delivery vehicle. It's ideal for weekend hunting and fishing trips, family traveling vacations, your round-the-town hauling chores, transporting troops of kids or any job that calls for space, comfort and style. With Sportvan you can go as economically or as luxuriously as you like by ordering the regular Sportvan, Custom Sportvan or the Deluxe Sportvan. They come in

two sizes to fit your space requirements and in two capacities to match the loads you want to carry. Sportvan 90 holds up to 204 cubic feet of payload or 8 adults with optional rear seats installed. The spacious Sportvan 108 lets you pack in up to 251 cubic feet of gear or 8 adults with Sportvan's rear seats. Every Sportvan model comes with thick foam-cushioned bucket-type driver and passenger seats upholstered in attractive vinyl. Order the

Sportvan 108

removable rear seats to carry six additional passengers. The engine is tucked away under the "coffee table" between the two front seats. There's 6-cylinder or V8 engine power to meet your requirements or preference. The 175-hp High Torque 283 V8 is standard in all V8 models. This modern short-stroke engine is noted for spirited performance yet provides low cost per horsepower. If you prefer a Six, the 140-hp 230 Six is standard in 6-cylinder Sportvans. For

greater power with a Six ask for the 155-hp 250 Six. Chevy Sixes are favorites for economy and durability. There's a choice of transmissions, too. The standard 3-speed manual transmission is fully synchronized for easy shifting. Go fully automatic if you wish with the popular Powerglide transmission. New tapered leaf springs float Sportvan along as gently as you please, yet give sturdy support for big loads. You'll like the way Sportvan combines luxury and utility.

Deluxe Sportvan with optional rear seats

ready...

with features to please every member of the family

Sportvan is loaded with features that add up to greater convenience, safer driving and more fun on every trip. The huge contoured windshield, for example. Plus double curbside and rear loading doors. Retractable side door step. Flat rear compartment floor. Swing-out side windows. Push-button-type inside front door locks. Electric windshield wipers and washers. Glove compartment, ashtray, color-keyed interiors and seat belts, armrests, front and rear dome lights. Padded instrument panel crown with non-glare paint on the dash. Flat-design control knobs. High beam and turn signal indicators. And there's a choice of four interior colors keyed to 15 solid and 13 two-tone exterior colors. You can order from a long list of accessories, such as radio and west-coast-type rear view mirrors, from your Chevrolet dealer. And if it's camping you have in mind, ask him about his dealer-installed camping equipment.

set...

for years of dependable traveling

New Ride—Easy ride with solid support is one thing you'll particularly like with Chevy's Sportvan. The secret is in Sportvan's newly designed tapered front and rear leaf springs. Tapered springs are thick at the center where greater stress develops, thinner at the ends where there's less stress. The result is fewer leaves, less unsprung weight, reduced interleaf friction and exceptional ride quality. Just what you're looking for to ease those long trips with the family.

New Dual Brake System—Extra safety is provided by a new Dual brake system. Brakes operate through two master cylinders during normal braking. Accidental damage to a hydraulic line is isolated by a pressure valve and stopping power is maintained at front or rear wheels. Caution light in cab indicates low pressure during brake application. Brakes are self-adjusting.

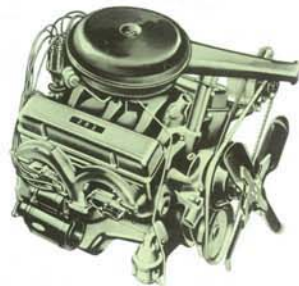

Custom Sportvan Features (In addition to or replacing Sportvan equipment)—Painted fiberboard sidewall panels, upper wall plastic trim panels and vinyl-coated headlining for rear compartment with bright trimmed roof bows. Padded vinyl engine housing rear panel. Right-hand sunshade, ornamental horn button, cigarette lighter, four coat hooks. Front and partial rear floor mats of color-keyed vinyl-coated rubber.

Deluxe Sportvan Features (In addition to or replacing Custom Sportvan equipment)—Distinctively textured vinyl seats and matching vinyl-covered front door and sidewall panels, vinyl spare wheel cover. Full-length color-keyed vinyl-coated rubber floor covering. Bright metal belt molding, hub caps, bumpers and outside mirror.

Body—All-welded unitized body-frame construction: Heavy-gauge panels and structural members are welded together to form a tight, rattle-free body. Weather-protected underbody: All underbody surfaces and enclosed areas are specially treated to resist rust and corrosion. Asphalt mastic is applied to certain underbody components, such as wheel housings, to deaden sound and seal out moisture.

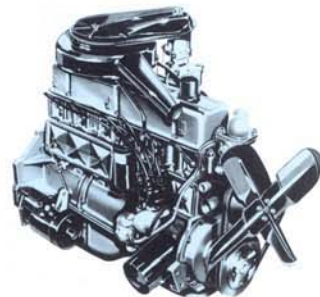

go!

...with V8 power

Spirited 283 V8—The 175-hp 283 V8 offers lively and spirited performance, yet provides low cost per horsepower. It's designed to run efficiently on regular grade fuel. The 283 V8 is standard equipment on three Sportvan models. The 1/2-ton Sportvan 90 and Sportvan 108 and the 3/4-ton Sportvan 108. You'll appreciate the 283 V8's performance with big loads and on hilly terrain.

...or economical six

Economy and durable power go together in Chevy Sixes. The 140-hp 230 Six is standard in 6-cylinder Sportvans. Or for maximum power with 6-cylinder economy you can order a 155-hp 250 Six. Compression ratios of 8.5 to 1 provide top efficiency on regular grade fuel. Seven-main-bearing crankshafts mean smooth performance and durability.

Chevy Deluxe Sportvan 108

Chevy Sportvan works in style (and plays after hours)

Series G10 Chevy-Van

Can a vehicle that looks this good put out a hard day's work? You bet it can. Unitized body-frame construction provides a virtually unobstructed van interior for easy loading and unloading. The perfectly flat steel floor features deeply embossed skid strips. Just slide in the load and be on your way. With 90" wheelbase models, there's room to the right of the engine compartment for loading objects more than 12 feet long, more than 13½ feet long with the 108" wheelbase models. With an inside floor-to-ceiling height of 4½ feet and a load compartment that's only 22½ inches off the ground, Sportvan makes it easy for owners to load up to over 2,000 pounds of cargo. And when the chores are finished, Chevy Sportvan is ready to keep going.

Sportvan has the same family muscle and brawn that's built into the Chevy-Van. For complete information and specifications on Chevy-Van models, see the 1967 Chevy-Van Catalog.
